

## Classification : Labeling, MSDS and ADR for Chemicals

## Why EQGEST is the best solution?

- EQGEST is a solid software with more than 10 years in the market and adaptable to your needs.
- Always updated and constantly incorporating regulatory changes and functional improvements.
- The best support in IT and regulatory.
- Documentation in all EU languages and others as Arabic, Russian, Turkish, Ukrainian, Bosnian.
- EQGEST has a module that enables easy integration with ERP software company.
- Module for design and printing of labels.
- Other utilities such as versions of MSDS management, MSDS notification to client, technical data...
- Updated to regulation (EC) No 1272/2008 (CLP Regulation, European adaptation GHS).

EQGEST has a tool for label design that allows each user to design a simple way their own models. To print labels you need to select only the product, the label content (pictograms, phrases, etc ...) will depend on the classification for each product has EQGEST in its database and will vary in the extent to do legislation or the formulation of products.

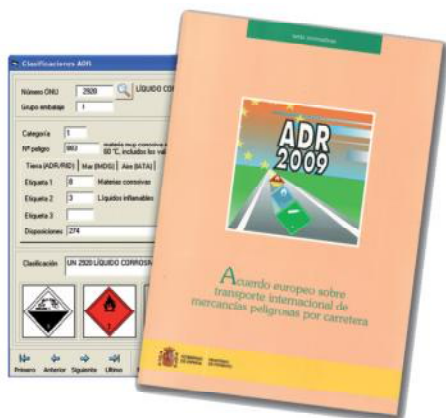

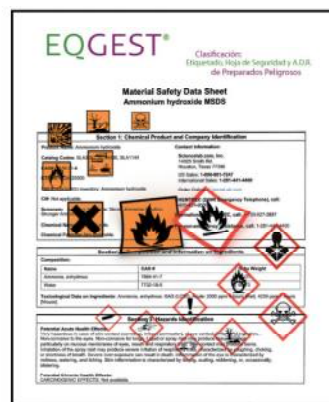

It is also possible to link the label with the batch manufacturing ERP software. Thus selecting a production order can automatically collect data such as lot number, product labeling, manufacturing date, bar codes, etc. . .

Is Available a label printing module is designed for use by users who should not have access to data in product formulation or calculation parameters system. The label printing can be done by any printer; Laser, termical

## MSDS

From the classification of products we can deliver the corresponding MSDS. This document is written following the instructions given in Annex II of REACH and taking into account the result of calculation to determine their dangerousness. Moreover, the application allows you to customize this document by entering text that will appear or not depending on the content of the preparation or the result of calculation. MSDS templates are easily customized for any user.

EQGEST includes a utility to manage the delivery of MSDS to customers when there are changes that require further review, this notification may be performed by printing or sending MSDS attached to an e-mail that the system automatically sent to the recipient.

## ADR

Once ADR classification assigned to each product and created the types of packaging used the system only needs to know the relationship of goods to be dispatched to issue ADR documentation (letter of carriage, trencards...). Data for the issuance of documentation can be entered manually or imported EQGEST from delivery notes generated in the management system.

These documents are written in accordance with ADR 2009 and as in all areas of EQGEST will be updated to any changes that arise after publication of the new regulations.

## REGULATIONS

- Regulation (EC) No 1907/2006 (REACH).
- Directive 67/548/EEC on the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances and all of their subsequent adaptation to technical progress (ATPs).
